

The Belenos Gala will also be an opportunity to support, through the Belenos Student Project, an art project initiated by art students.

The organizers of the Belenos Prize and Gala have entrusted a group of art students from various art schools in Brussels to design an ephemeral artistic installation to be realized in the Monumento Park, dedicated specifically to in situ and land art, located in Anderlecht-Brussels.

During the year 2019, these students imagined a global artistic installation project for the park. The aim is to realize their installation in spring 2020 to make it the opening exhibition of the Monumento Park season.

To this end, the organizers of the Belenos Gala have decided to organize, during the evening, a beautiful raffle richly endowed to reap the necessary funds to allow the realization of this unique project.
